Security needs, as well as monitoring*

Fight Crime

With now the longest recession since 1930 and with massive unemployment it is not a surprise that crime seems to be everywhere.

Listed below are a few tips to help diminish burglary and car theft.

- Never leave anything on the seat of your car or in view in your SUV.
- Do not leave your purse/wallet on the counter, typically it is the first thing taken.
- Obviously, lock all the windows and doors –walk around and check your home, you may be surprised to find a window unlocked.
- Turn on your security system every night-so you will not wake up to an unwanted visitor in your home.
- Even when leaving for just a short time set the security system – our new systems have a keychain remote that comes with the system.
- Buy some timers for lights not just for vacations but for every night.
- Make sure your yard sign is visible-it is a great deterrent and helps the emergency vehicles find your home when seconds count. If you need a new sign call Alicia Johnson @ 636-458-1866.

Phone Alternatives

With all of the push to save money on phone bills and bundled cable, phone and high speed internet, here is what you need for your security system.

Older security systems need a land line. Cable phone or U-verse may not communicate.

If you change phone companies:

- 1) Call us first; we may be able to help.
- 2) We have options for cell transmission, with a payment plan to update your system.
- 3) Avoid Vonage and Magic Jack as your system will not work, even with the newest systems.

Batteries –Fixed Pricing

We now have a fixed price for both the main battery as well as GE sensors. In order to make the necessary battery replacement as painless as possible.

Price of battery plus labor (Trip charge not included in pricing)

- Main panel: 1 Battery-\$ 35.50 + \$10.00 labor to install.
- Radio battery: \$17.95 + \$10.00 labor to install
- Window/Door sensor: \$2.95 each + \$5.00 each labor to install.
- Smoke detector: \$5.95 each – (needs 2) + \$5.00 labor to install.
- Motion Detector: \$5.95 each (needs 2) + \$5.00 labor to install.
- Glass breaks detector: \$ 9.75 each (needs 2) + \$5.00 labor to install.
- Key fob battery: \$2.95 + \$5.00 labor to install.

(Prices include recycling since most sensor batteries are lithium and the main panel batteries are a small car battery.)

As always we also have battery kits with instructions if you want to do it yourself. Just give us a call.

****Batteries**Batteries **Batteries****

For the last 15 years when systems went to wireless. Batteries have become a crucial part of the system. Here is the expected life of a battery:

- Main panel batteries -3 years (some systems have 2 batteries)
- Radio back up batteries -3 years
- Window/ Door Transmitters 4 to 5 years
- Motion sensors 3 years
- Smoke detectors 3 years
- Glass Break detectors 3 years

Remember a low battery signal is a call for help. Your system may not signal for that fire or when the back door is kicked open at 2:00 AM and you are in bed!

Want to quit writing that check?

Call us 636-458-1866

Winter Travel Security Tips

- 1) Cancel mail and newspapers. It can be easily done on the internet.
- 2) Have someone check the house periodically.
- 3) Consider turning off the water and ice makers.
- 4) Have snow shoveled to make it look as if someone is home.
- 5) Call us and have us install a temperature alert so we can tell you if the furnace has failed.
- 6) Call and give us your phone numbers to reach you while you are gone.
- 7) Install light timers in several rooms, at different times to make it look as if someone is home.
- 8) Run a test of your alarm to be sure that it is working correctly, before leaving.

Neat new products

The latest version of GE Security Pro Panel includes conveniences

- Turn your system on and off with your I-phone or BlackBerry.
- Turn your system on and off remotely over the internet.
- Use your system to control lighting for convenience and security (Save on Energy Cost).
- Control your heating and cooling remotely with your computer (Save on Energy Cost).
- View your home or business over the internet (Peace of Mind).
- Get emails to alert you when your alarm is arming and disarming.

Carbon Monoxide Detectors

Deadly* Odorless* Invisible

As we transfer from summer to fall it's time to think about Carbon Monoxide Poisoning.

Gas water heaters, gas furnace, gas logs, and any gas appliance with clogged vents can be a problem.

Install a Carbon Monoxide Detector on your system this fall and we have a special \$149.00 installed price. Sleep better knowing you are protected.

Would you like to save \$1,000.00?

Here is how to do so:

- 1) Drop your land line
- 2) Update the system with a cell transmitter (Cost is \$299.00)
- 3) Your monitoring will go up about \$10.00 per month but since your phone bill disappears you save \$40.00 per month for 36 months. The bottom line you have saved an extra \$1,000.00.
