

SALESPERSON KNOCKING AT YOUR DOOR? BE SKEPTICAL!

It happens every and summer: less scrupulous security alarm companies deploy teams with high-pressure tactics to your door, even if you already have an alarm system.

Don't fall for their schemes. You can be certain Butler Durrell Security continues to provide the reliable service you know and trust. You get the most innovative security technology from us too. When the door knockers arrive, if they aren't selling cookies, why even open the door?

They may deceive homeowners saying your current security company is out of business or demonstrate new technology and imply that your current company cannot offer it.

SUMMER TRAVEL TIPS PHONES THE OLD WAY

Summer is here, travel is near!

1. When you leave check all doors and windows for a locked position.
2. Cancel mail and newspapers—can now be done on the internet.
3. Have your grass mowed.
4. Make sure you have a yard sign on the front lawn. They are effective in chasing the would be burglar to another home that does not have security.
5. Let the police know of your absence—many departments will check out your home.
6. Get some timers and set for different on and off times, this will give your house that normal appearance.
7. No social media notification before you leave. Talk about your trip after the trip.
8. Unhook all garden hoses.

New systems and most older systems other than Westec use a cell line and transmitter and avoid phone/alarm transmission problems.

We are pricing the basic transmitter at \$69.95 currently and rent a cell line for only an additional \$14.00 per month.

ADVANTAGES-

1. Drop your phone line or get a less expensive service and save money each month.
2. Cell transmission cannot be cut on the outside of your home like the phone or cable line.
3. Stop annoying alarm problems that keep you up at night from the Charter or U-Verse phone line dropping out in the middle of the night.

TOTAL CUSTOMER CARE

What a nice feeling it is to have your system inspected and tested every year, have batteries replaced automatically and any repairs covered in the monthly fees.

All of this is possible with our Total Customer Care program, which starts at \$10.95 per month. For a limited time, until July 15, 2014, we are offering Total Customer Care on older systems. Call us for a price on your alarm system.
